This is the stuff they don't want us to see. Please share this information with everyone you know.

(Warning, some of these pictures are gruesome at first glance. I assure you though that the blood and gore is all fake, I can prove it simply by informed medical observation.)

I've studied and graduated EMT-B certification with the state of Oregon. I've been on calls with heavy arterial bleeds, internal bleeding, fatalities, doa's. I am speaking from direct personal experience with severe trauma.

Here is a telling photograph of the amputee actor. I encourage readers to view the photo side by side with my analysis.

<http://www.kaotic.com/media/pictures...42b556ee65.jpg>

If you loose both your legs from explosive trauma half your blood is gone in one minute via the femoral arteries, youre dead after two. Bleeding out is worse with blunt force trauma (like shrapnel) because flesh is torn rather than cut, exposing more arterial and vascular tissue. The human body holds 5 to 6 LITERS of blood. If that really happened you would see blood EVERYWHERE, the guy would be drenched in it. You would also see what's called arterial spurting from the injury. Most likely he would vomit after turning ghost white from shock, then turning delirious or passing out. As for the "tourniquet"...

Its not even tied off, its suspended via gravity, which would literally do nothing to an arterial sever. There's no pressure applied. There's no knott with a turn stick for leverage. You can clearly see a gap in the nonexistent wrap job on his left inner thigh (left anterior proximal for you experts) His hands have no blood on them. There's no blood on the ground. The color in his hands and lips shows good circulation.

This is an actor. This is staged. How did they pull it off though? I can show you.

Here in frame six on the left we see the the man with a hood setting up the fake leg wound prosthetics. His attention and hands are right there. The woman is acting as a shield covering what's happening.

Frame 6

Here in frame eight the prosthetics are in place. Amidst all this chaos seconds after the explosion the hooded man takes the time to put on his sunglasses which is a signal.

Frame 8

Here in frame nine with sunglasses now on the hooded man and the woman make eye contact, signal received.  
Frame 9

In frame eleven after receiving the go signal the woman makes an open hand gesture the direction both of them are looking, signaling the staged injuries are in place for cameras. The prone amputee raises his left prosthetic injury into the air over the woman's shoulder. No blood is present. The bone is dry, no blood on his leg above the knee, no blood on the woman, no arterial spurt, nothing.  
Frame 11

Here in frame fourteen the woman turns her head right but is still holding up that open palm signal with her left hand. The hooded man again busies himself pouring fake blood on the pavement behind the woman. The amputee has both fake injuries in the air now. There is still no blood on his legs, his skin above the injury is clean and dry.  
Frame 14

Frame twenty, the fake blood and prosthetics are in place. The amputee gives an open hand gesture along with the woman to bring the cameras in. We're now twenty frames in and still not a drop of fresh blood from a double leg amputation. His legs are dry, the woman is dry and unscathed. Both are making the same hand gesture.  
Frame 20

These are actors. This is staged. It was flash powder. There was no crock pot nail bomb. There are no bombers, only patsy. If your looking for a gunman look at the Army in the streets of Boston. Share this knowledge with everyone.

This video is good enough proof that it is fake. Very interesting.

There's more. I recommend opening this image in a new window to be viewed along side my analysis.

<https://secure.flickr.com/photos/950...03/8664188128/>

This image was taken by a third party photographer seconds after the first explosion. There is clear evidence of false flag staging here. The man in the red coat and baseball hat on the right is kneeling down

Rep Power: 0

giving directions to the guy in the white T-shirt. Also looking to this pair for direction are the woman sitting to the right and the man in a hood and sunglasses who set up the double amputee prosthetics.

Notice the relaxed posture and face of the hooded man. Notice also the calm prepared posture of the woman sitting down on the bottom right. See how her shirt sleeve is severely torn, yet her skin underneath is clean and clear of injury and blood. From where she's sitting look right to the bottom right corner and you can see an unmarked bottle of fake blood.

Look to the left and see the cowboy hat man standing there doing nothing. This is the same man who will pretend to hold the tourniquet of the fake amputee actor later on. Look to center of the photo and you will see the african woman moving herself away from the amputee actor since her shielding him from camera's job is over. Next to her is a woman with red hair leaning on her elbow.

Compare this now with another photo taken seconds later. Putting them side by side is very helpful.

<http://www.kaotic.com/media/pictures...e49d7e146a.jpg>

The man with the hood and sunglasses, who was just sitting up looking fine and healthy after fixing up the amputee actor's prosthetics, is now on his back being evaluated by two people. Notice the rips in his jeans have no sign of blood or injury on the skin. The woman with red hair however is in the exact same pose as a minute ago. Meanwhile the double amputee actor is completely ignored by everyone when he is clearly in the most dire need of attention. There is a small amount of fake blood around him where the african lady shielding him used to be, she has dissappeared. What happened to her? Compare this photo with the first in my post.

<http://www.kaotic.com/media/pictures...e90a76264c.jpg>

The african woman who was sitting up, shielding the hooded man and amputee actor's prosthetic rigging, giving hand signals, looking left and right, having no visible blood or injuries, is now covered in blood and strapped into a spine board stretcher.

In a real medical scenario the amuptee would receive immediate treatment or die from bleed out. The fact this actor woman is removed from the scene via stretcher while the double amputee is left on the ground is ludacris. He would be dead from blood lose before they could even begin spinal assessment procedures involved in moving a patient to a stretched. Not to mention his blood lose would be over five liters, enough to cover the entire scene around these people in a thick puddle.

From firsthand experience with trauma in the field of EMS work, this is not real. These are actors. This is all staged.

I'd like to point out that the two kids supposedly got into a shootout with dozens of police. One of the kids managed to fight his way out of the situation and then escape. Were these kids highly trained military commandos or something? The fact that one of them escaped just

Age: 28  
Stats: 5'10 175lbs  
Posts: 4  
Rep Power: 0

boggles my mind.

There's just something not right about this story. We are being told that a 19 year old pot smoking hippie magically transformed himself into Jason Borne out the clear blue. I imagine that every cop in the state responded to that shootout, yet the kid still managed to escape? How? The story simply ends with the kid driving his SUV through a line of police cruisers. Are we to believe that the police simply sat back and watched him drive off into the sunset?

Supposedly they hijacked an SUV and told the driver that they were the Boston bombers – which I find to be laughably ridiculous. If you were them, would you announce yourself as the Boston bombers while hijacking a car and then let the victim go on his merry way? Why would you even announce your crimes at all? If they were really bloodthirsty killers, why not just kill the SUV driver so there wouldn't be any witnesses? Obviously they intended to kill dozens of innocent people with bombs, so what's one more victim? Especially one more victim that could finger your location and put the police on your trail!

The whole story just stinks, and it keeps getting stinkier.

Well the guy not bleeding like crazy after having his legs blown off actually sounds kind of logical, don't you think so? Then again I know nothing about wounds so it might be normal.

There could be a million explanations... it's a shitty picture it's hard to even tell what's going on. C'mon that is no where near proof of a conspiracy.

Either there is an arterial bleed for that fresh bright blood that never oxidizes and the guy would be dead in minutes, but then why is there

no blood on his hands and knees? Why is there no blood in the frame by frame? Why does his hand skin color and lip color show good circulation?

Because of the tourniquet you say? You mean THIS tourniquet?

<http://www.kaotic.com/media/pictures...42b556ee65.jpg>

This non-existent Hollywood joke of a tourniquet is stopping a double leg amputation bleed out? ON A WHEELCHAIR LEGS NOT ELEVATED none the less.

Speaking of wheeling him away, why in the world would you put a guy who could tank at any second in a wheelchair? What a mess of a scene where boo-boos get neck braces and gurneys and mortal wounds get the parade route in a wheelchair...

possibly in shock, after an explosion don't you think it would take them some time to realise what the fuck just happened, have you ever been sucker punched out of the blue? they would just be mind fucked as to what happened

have you ever seen that much blood, it doesn't oxidize that quickly.

you don't know how soon after the explosion the photo was taken, this could be other peoples blood, they could have been moved away, their wounds aren't visible from this photo.

there are so many answers for these pointless questions, dedicate your time to something more useful. you're wasting your time, this isn't a conspiracy. what would government achieve from this?

Ok, I'll agree with you on these points, but this is just a snapshot. you got no idea what was happening before or after this or the demeanor of these peoples injuries. Maybe paramedics told them to stay in place even though they weren't badly injured, hence the chill attitude? They could also be somewhat in shock of everything that happened. Keep in mind they're probably all very confused.

have you ever seen that much blood, it doesn't oxidize that quickly.

you don't know how soon after the explosion the photo was taken, this could be other peoples blood, they could have been moved away, their wounds aren't visible from this photo.

there are so many answers for these pointless questions, dedicate your time to something more useful. you're wasting your time, this isn't a conspiracy. what would government achieve from this?

You two are two flustered and emotionally invested to actually discuss these things with.

Just remember, the Patriot Act has passed, the NDAA act has passed, CISPA just passed today (another coincidence), the government virtually declared martial law in Boston and went through people's houses without warrants. Now repeat after me "America, land of the free."

Ok, I'll agree with you on these points, but this is just a snapshot. you got no idea what was happening before or after this or the demeanor of these peoples injuries. Maybe paramedics told them to stay in place even though they weren't badly injured, hence the chill attitude? They could also be somewhat in shock of everything that happened. Keep in mind they're probably all very confused.

Actually they don't look injured at all and clearly the bomb has just went off seeing as you can see people running in the background, so that begs the question where is the blood coming from?

There is no coming to consciousness without pain. People will do anything, no matter how absurd, in order to avoid facing their own soul. One does not become enlightened by imagining figures of light, but by making the darkness conscious-Jung

Education Is What Remains After One Has Forgotten What One Has Learned In School/ I never came upon any of my discoveries through the process of rational thinking-Einstein

If you want to find the secrets of the universe, think in terms of energy, frequency and vibration/ Most certainly, some planets are not inhabited, but others are, and among these there must exist life under all conditions and phases of development- Nikola Tesla

Wounds from an IED and this bomb was an IED, are cauterized usually from the blast itself. Don't get me wrong you can and will bleed out but for the most part its usually cauterized a little bit.

USMC Crew  
NuMisc is da tata's  
I actually lift Crew

I rep back and always rep my fellow military brahs
